Press Release

Chayora launches 360° Virtual Reality tour of Tianjin datacentre

Hong Kong – June 29, 2021: Chayora Holdings Limited, an international infrastructure investor, developer and operator of hyperscale [data centre campuses in China](#), is excited to announce the launch of a fully immersive, virtual reality tour of its [Tianjin datacentre](#), China.

Due to the extended COVID restrictions on travel, prospective customers outside of Mainland China have unfortunately been unable to visit the newly developed datacentre in Tianjin, (TJ1) in person. However, using the Oculus Quest 2 VR Headset, virtual tours can now be booked online or in person, using the booking system open on our website. This experience enables customers to virtually explore every inch of one of the world's most advanced datacentres, as though they were there in person. The 32-hectare / 80-acre campus, equivalent to 61 standard football fields, is one of the biggest data centre campuses in the world. Strategically located at the heart of Northern China in the Beijing, Tianjin and Hebei Tri-state Region, it caters to the growing focuses on artificial intelligence, financial services and high technology sectors.

This Chayora facility was the first OCP Ready™ data centre in China and is accredited as an Uptime Institute Tier III Certification of Constructed Facility, underscoring its construction and design in accordance to the highest international standards. It complements [build-to-suit services](#) available to both international and Chinese domestic hyperscale cloud service providers elsewhere on the Chayora Campus. Thanks to our advanced VR experience, prospective customers may observe the advanced architecture which earned these prestigious awards.

Chayora officially launched the VR experience in China at the World Intelligence Congress in Tianjin, at a spectacular technology event which had over 75,000 in person attendees and was visited over 1.6bn times digitally, according to the organisers.

“Using VR technology is a terrific way of experiencing our campus as though you were there in person.” said Oliver Jones, Co-Founder and CEO, Chayora. *“We will be delighted to host you virtually to our advanced datacentre, offering capacity scalable from single racks up to 25,000 racks accessing over 300 MVA power available to serve the largest hyperscale requirements.”*

Anyone interested in [booking a virtual tour](#), using a VR headset for the full experience, or a desktop if preferred, should head to <https://www.chayora.com/> where you will find the link to book!
